

**Response of HEI to DVV findings for Metric ID -1.2.1**

**Metric Id 1.2.1:**

*Number of Certificate/Value added courses offered and online courses of MOOCs, SWAYAM, NPTEL etc. (where the students of the institution have enrolled and successfully completed during the last five years)*

**Finding of DVV:**

Please provide information about each program, including its name, duration of the program, a list of students who have enrolled along with name and signature of students, and assessment procedure year by year.

**Response of HEI:**

**As per your findings, please find attached the followings:**

1. Please find attached a table containing the details of each program, including name of the program, duration of the program, number of students enrolled, curriculum details and assessment procedure.
2. Please find attached the list of students who have enrolled for each program along with name and signature of students (attendance sheet).

The response and supporting documents for the findings of DVV is as per the records of college.

## Course Module

### SHORT TERM TRAINING PROGRAM (STTP)

#### ON HPLC

##### **Introduction**

Quality Assurance (QA) and Quality Control (QC) is a dynamic and challenging profession that is vital to make safe and effective healthcare products available worldwide. With increased regulatory pressure on the pharmaceutical industry, there is growing need for capable and efficient QA and QC professionals who can ensure product quality.

##### **Aims and Objectives**

The aim of STTP in Analysis is to train specialists who can be effective teachers, Analytical experts and research workers in the specialized field of Analysis. This course is designed to develop in-depth theoretical knowledge with hands-on skills and practical exposure to the students to perform Analytical Testing using HPLC competently and confidently.

##### **Duration of course**

STTP duration is 30 Hours covering Theory and Practical

##### **Eligible Candidate**

- A student holding Bachelor degree of sciences, Pharmacy, Technology etc is eligible for admission to STTP.
- Students pursuing the Masters degree of sciences, Pharmacy, Technology etc. are also eligible for admission to STTP.
- Industrial persons from R & D, QA/QC Dept. or working in any analytical fields are also eligible for admission to STTP.

##### **Course structure Theory**

###### **Module I: General Chapters**

- Basic Principle, Instrumentation, Application, Advantages and Disadvantages of High Performance Liquid Chromatography (HPLC Shimadzu P series).

###### **Module II: Method Development and Validation**

- Introduction to Method Development and validation
- Study of parameters in Method development
- Importance in Research and Quality control.
- 2) Importance and need of validation in Analysis

- Study of Validation parameters according to ICH guidelines

### **Practicals - Module III**

- HPLC Software learning
- Instrument handling
- Single component formulation analysis on HPLC
- Multi-component formulation analysis on HPLC
- Qualitative drugs analysis and interpretation on HPLC
- Study of Validation parameters

### **Fees structure**

INR 1000/- (Indian Rupees One Thousand five hundred Only)

#### Y B Chavan College of Pharmacy

Y. B. Chavan College of Pharmacy is a well-known pharmacy college located in Aurangabad, Maharashtra, India. It is affiliated with the Dr. Babasaheb Ambedkar Marathwada University, Aurangabad. The college offers undergraduate and postgraduate programs in pharmacy, including Bachelor of Pharmacy (B.Pharm) and Master of Pharmacy (M.Pharm) courses. Y. B. Chavan College of Pharmacy is recognized for its quality education, research facilities, and contribution to the field of pharmaceutical sciences.

#### Outcome of the STTP

- Outcome of the STTP is to train specialists who can be effective teachers, Analytical experts and research workers in the specialized field of Analysis.
- STTP is designed to develop in-depth theoretical knowledge with hands-on skills
- STTP is providing practical exposure to the participants to perform Analytical Testing using HPLC competently and confidently.
- STTP is make the participant expertise in the method development and validation of single drug and simultaneous estimation of drug and trouble shooting on HPLC

## Activity Report

### Title of Activity: Short Term Training Program (STTP) on HPLC

1. Date: 14<sup>th</sup> September to 18<sup>th</sup> September 2023 (30 Hours)
2. Venue: Y. B. Chavan College of pharmacy, Aurangabad.
3. Outcomes of the activity achieved:

The main Objective of STTP is to train specialists who can be effective teachers, Analytical experts and researchers in the specialized field of Analysis. Considering the objectives a detail programme has been conducted with special focus on theoretical and practical aspects. Participants have gained knowledge about the basics of HPLC Instruments and other theoretical aspects. They handled the instruments independently. Participants gained the knowledge of method development and validation and other aspects of troubleshooting.

4. Description of activity:

Y. B. Chavan College of Pharmacy Aurangabad organized a 30-hour, four-day STTP on High-Performance Liquid Chromatography (HPLC) from September 14<sup>th</sup> to 18<sup>th</sup>, 2023. This program was, coordinated by Dr. J. N. Sangshetti, Head Quality Assurance Department, and Dr. Mohd Sayeed Shaikh, In charge of the AIR Facility Laboratory. 11

participants from different institutes from Marathwada attended the Programme, where they received comprehensive theoretical knowledge and practical skills.

#### 5. Activity Experience:

The training program focused on providing participants with practical exposure to perform Analytical Testing using HPLC competently and confidently. Specific areas covered included:

- 1) Method Development and Validation: Participants gained expertise in developing and validating methods for single drug analysis.
  - 2) Simultaneous Estimation of Drugs: Participants gained expertise Techniques for simultaneously estimating multiple drugs using HPLC were covered, enhancing participants' proficiency in pharmaceutical research and quality control.
  - 3) Troubleshooting on HPLC: Participants gained expertise insights into troubleshooting common HPLC issues, enabling participants to identify and resolve challenges effectively.
- This STTP on HPLC served as a valuable platform for participants to acquire practical skills and theoretical knowledge, empowering them in the field of pharmaceutical analysis.

## Activity Report

**Title of Activity:** Hands on Training Programme on HPLC

1. **Date & venue :** 13/12/2022 & 14/12/2022 & Y. B. Chavan College of pharmacy, Aurangabad.
2. **Outcomes of the activity achieved:**
  - Resource person Mr Kiran Navale conducted the two days hands on Training Programme on HPLC.
  - Participants have gained knowledge about the basics of HPLC instruments and other theoretical aspects.
  - Teaching staff, PhD and M Pharm students handled the instrument independently.

3. **Description of activity:**

Department of Quality Assurance in Association with Spinco Biotech Pvt Ltd organized Hands on Training Programme for PG students, PhD Students and staff. Total 82 Participants were present. The first day started with very informative presentation by Mr Kiran Navale (Spinco) on basics of HPLC and method development. In second half resource person has given in-depth demonstration on Handling and Troubleshooting of HPLC.

On Second day of the training programme each participant has been given training on operation. Participant individually handled HPLC. Different aspects of Troubleshooting have also been explained by the Resource Person.

4. **Activity Experience:**

The participants experienced the significance of HPLC and method development. The principle and procedure were discussed amongst the participants. The programme aimed to impart the training to faculty and researchers about the HPLC handling and the same skill can be transferred to students. Overall the activity created interest in the students and staff through interaction with the resource person.

5. **Feedback**

Feedback was obtained from the participants; all the participants expressed their satisfaction for the activity. They were impressed with the arrangements and interactions with the resource person.

**About Workshop:** During the course of developing a chemical reaction to produce a desired product, the synthetic organic chemist typically goes through the repeated sequence of reaction set-up, work-up, purification, and final product analysis. A large number of methods are available for the purification of substances. The choice of method, however, depends upon the nature of substance (whether solid or liquid). It also depends on the type of impurities present in it. Flash chromatography is currently one of the most popular techniques for purifying pharmaceutical intermediates, as well as final organic products. It is also widely used in natural products research.
